**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to an electronic device, classified in class 313, subclass 519.
  - II. Claims 15-24, drawn to a method of manufacturing an electronic device, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of etching through the insulating films by using the resist film as a mask to form a depressed portion, one may deposit the photo resist layer in order to form a pattern on the substrate, then deposit the insulating layer on the photo resist layer and etch away the photo resist layer.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
